HYVE
MANAGED HOSTING

Maximise your business potential

Hyve's Managed Enterprise Cloud bridges the gap between standard and premium by providing the ease of scale and cost savings of public cloud infrastructure, but with added security and monitoring. Experience high performance, reliability and scalability that out-performs the competition.

With a diversely-routed network and HP tiered storage arrays as standard, our enterprise managed cloud is well suited to customers with high I/O requirements. Enjoy the industry's fastest storage and 100% network availability without paying the premium.

We know that migrating and deploying cloud solutions can be a complex task, and that day-to-day management requires both a high level of technical expertise and resource. That's why our experts build and manage your cloud platform for you.

Delivering business outcomes

Why Hyve for managed enterprise cloud hosting?

As a highly accredited hosting company, you can rest assured that when you choose to host with Hyve, you're in very safe hands. All hosting solutions are deployed within our top tier data centers which are located across the globe.

We invest in industry-leading hardware, equipped with powerful resources to make your business shock-proof. Our Managed Enterprise Cloud runs on VMware – the market leader in server virtualisation software – and has high availability built-in. Using HPE BladeSystem architecture, we guarantee 99.999% uptime on all virtual machines, keeping your business always-on.

I cannot fault Hyve. Since day 1 they have provided a solid and secure service. They are a team of problem solvers and have helped provide countless solutions to our needs. They are reliable and are quick to respond via their ticketing service and I would certainly recommend them to any enterprise business looking for a trustworthy cloud solution.

Features of Hyve's Managed Enterprise Cloud

Global presence

With global locations to choose from you can ensure close proximity to your customers, guaranteeing low latency.

High-availability

All of our cloud platforms can be bespokely architected with high-availability, ensuring that your business is fully resilient and "always-on".

First-class security

Security is the backbone of our business. To protect your business against malicious attacks, we include 1GB of DDoS protection with every plan, at no additional cost.

Extra-mile support

Our UK-based support team are on hand 24/7/365 to support your infrastructure and make complex hosting simple.

Resilient power and cooling

Our data centers all offer multiple layers of redundancy for power and cooling, with a 100% network and power uptime guarantee.

Rapid hardware replacement SLA

With our HPE BladeSystem servers, we can guarantee any faulty hardware will be identified, resolved and fixed within 20 minutes, keeping your business online at all times.

How can Hyve help?
